nology that can boost a projector's contrast by over 900 percent, Zero Edge screens blend with surrounding décor. A new frame design provides better structural support, an integrated track system gives integrators the option to inlay an optional LED Lighting Kit behind the screen for added effect, and improved shipping cartons simplify jobsite handling and reduce freight costs by more than 65 percent on average.

Honeywell | Booth 4735

Honeywell's LYNX Touch 5100 is a Z-Wave-enabled self-contained security system offering Wi-Fi, as well as an alarm radio that can communicate via the 4G network. It also creates home-automation capabilities by fully integrating with Z-Wave-enabled thermostats, locks and lighting systems. Its large, intuitive, full-color touchscreen simplifies installation, as well as homeowner operation. Additionally, it includes an optional Android mobile device with a preloaded L5100 Connect application. Honeywell's Tuxedo Touch is a touchscreen controller that centrally controls security, cameras and Z-Wave enabled automation functions. With a bright, vivid, 7-inch color display, Tuxedo Touch uses built-in Z-Wave to control over 230 devices.

Intelix (Liberty AV Solutions) | Booth 1111

Intelix's new SKYPLAY-HD wireless HDMI distribution system is designed for just about any professional A/V application seeking the advantages of cord-free performance. Capable of seamlessly distributing high-definition HDMI audio and video up to 100 feet in both point-to-point and point-to-many configurations, each SKYPLAY-HD transmitter is compatible with up to 20 receivers. Fully HDCP compliant and operable in the 5GHz spectrum, the device's rugged black plastic enclosure houses five antennas to bring strong signals and coverage to all destinations.

KEF | Booth 1312

KEF's Ci (Custom Installation) Series of architectural loudspeakers, including square and rectangle models, provide custom installation professionals an array of high-performance audio solutions. Each new model in KEF's Ci loudspeaker series features a new Ultra Thin Bezel (UTB) design and select models are driven by KEF's Uni-Q driver array, proving installers with a discreet in-wall/in-ceiling loudspeaker solution. KEF's "Q" series Ci loudspeakers are backed by KEF's patented Uni-Q driver array, which places the tweeter in the acoustic center of the woofer. This allows both the woofer and tweeter to act as a single, focused source of sound that is dispersed widely and evenly throughout a room or setting.

Epson | Booth 4845

The Epson PowerLite Home Cinema 5020UB and 5020UBe offer outstanding 3D and 2D image quality and performance for home entertainment enthusiasts. With 1080p native resolution, contrast ratio of up to 320,000:1 and brightness of up to 2,400 lumens, these extremely bright 3LCD projectors are ideal for home theater. They feature bright 3D Drive Technology, as well as cinema filter for improved color fidelity and an innovative Split Screen mode for watching two sources at once. Both models now include two pairs of 3D glasses, and they are now priced at: Home Cinema 5020UB – $2,599; Home Cinema 5020UBe – $2,899.

ELAN | Booth 902

Elan Home Systems has four major additions to the Elan g! system — an Elan g!Mobile app for Android devices, more than 30 new drivers, full door locks integration and a new user interface architecture that allows for the easy addition of new features, user interface enhancements and integration with future platforms. Elan built its Elan g!Mobile Android app from the ground up because dedicated apps coded for each device are labor and time intensive to upgrade, and browser-based apps are often slow to respond and offer less graphically rich features. Elan has created an entirely new User Interface App Architecture that makes it much easier and faster to upgrade the GUI on every device with a single update instead of writing new code for each device.

Sunfire | Booth 902

Sunfire announces the HRSIW8, an in-wall dual-driver 8-inch subwoofer that features the brand's patented Stillbass anti-shake technology that virtually eliminates mechanical vibration, improving bass definition while helping to contain the bass to the room in which it is mounted. The Stillbass technology, coupled with Sunfire's trademark High Back-emf designed woofers, helps provide pounding audiophile-grade bass from a subwoofer that easily retrofits. The HRSIW8 features two custom-designed 8-inch long-throw woofers using ultra-low-mass fiberglass cones in a sealed cabinet. With six built-in dog-toggle style wall clamps it is a well suited solution for both retrofits and new construction jobs, conveniently fitting in any standard 16-inch on-center stud bay.

Runco | Booth 3531

Runco International has added the LS-10HBd to its LightStyle Series. The affordable high-bright, 3-chip 1080p DLP projector mea-
